

## COLABOR Art Science

A cooperation project between University of Applied Arts Vienna and University of Vienna

In times of rapidly growing and transforming communication technologies, artists and scientists feel the urge to communicate more than any time before. Researchers from different disciplines of art and science are becoming increasingly aware of the necessity to make a dialogue with people out of their specific research field, out of their studios and laboratories. In this context, IllustrationHub 2018 offered a platform for artists and scientists to meet and establish transdisciplinary dialogues. Held within the framework of WTZ Ost Science Communication programme at the University of Vienna and University of Applied Arts Vienna, IllustrationHub demonstrated an innovative perspective on multifaceted potentials of art and science collaboration towards novel methods of data interpretation and knowledge transfer. "COLABOR: Art Science" presents the result of this unique collaboration experience in the course of winter semester 2018.

### Works by:

*Artists:* Margit Busch, Romana Egartner, Jasmina Grudnik, Theresa Hattinger, Maria Kanzler, Lenz Mosbacher, Xenia Ostrovskaya, Valerie Tiefenbacher, Eva Weber, Roswitha Weingrill

*Scientists:* Judith Klaiber, Esther Greussing, Tatjana Atanasoska, Judith Kohlenberger, Lilia Diamantopoulou, Helmut Leder (EVA Lab), Angelika Doppelbauer, Lisa Krammer, Evgeniia Filippova

**Concept and development:** Solmaz Farhang

**With:** Tobias Reckling and Lilli Mahdalik (University of Vienna)

**Project coordination:** Angelika Zelisko (University of Applied Arts Vienna)

**Exhibition design:** Bojana Stamenkovic

Graphic design by Adrijan Karavdić
